

Property, Insights and Market Intelligence...

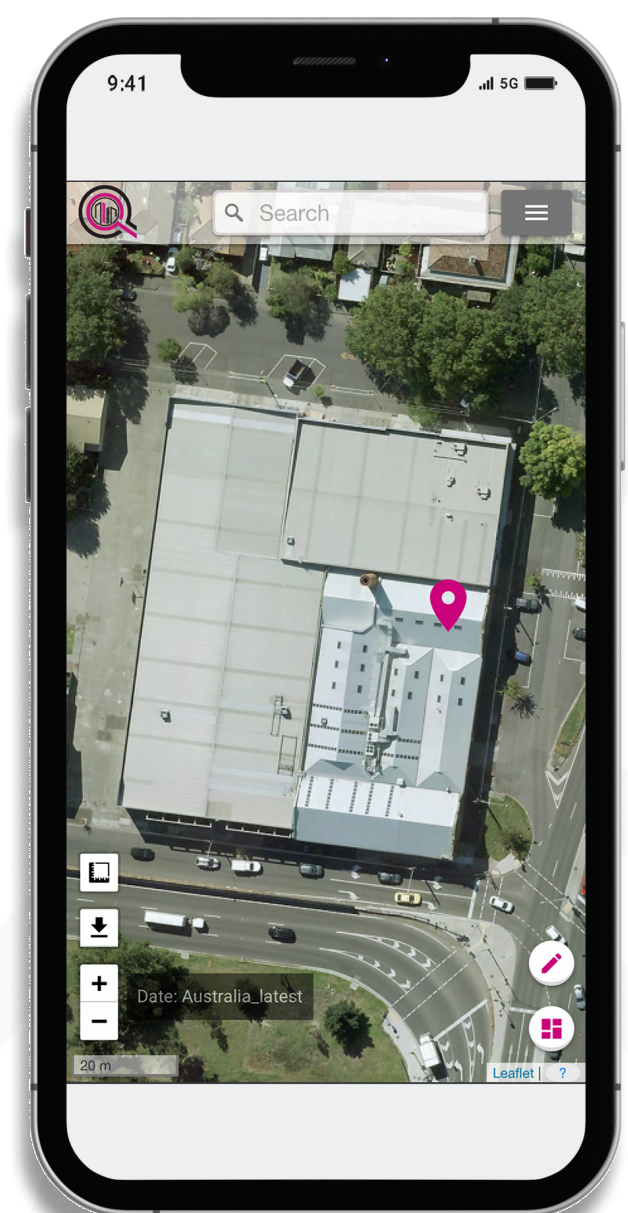

Introduction

Ever wondered how to analyse a property and it's surrounds at the click of a button?

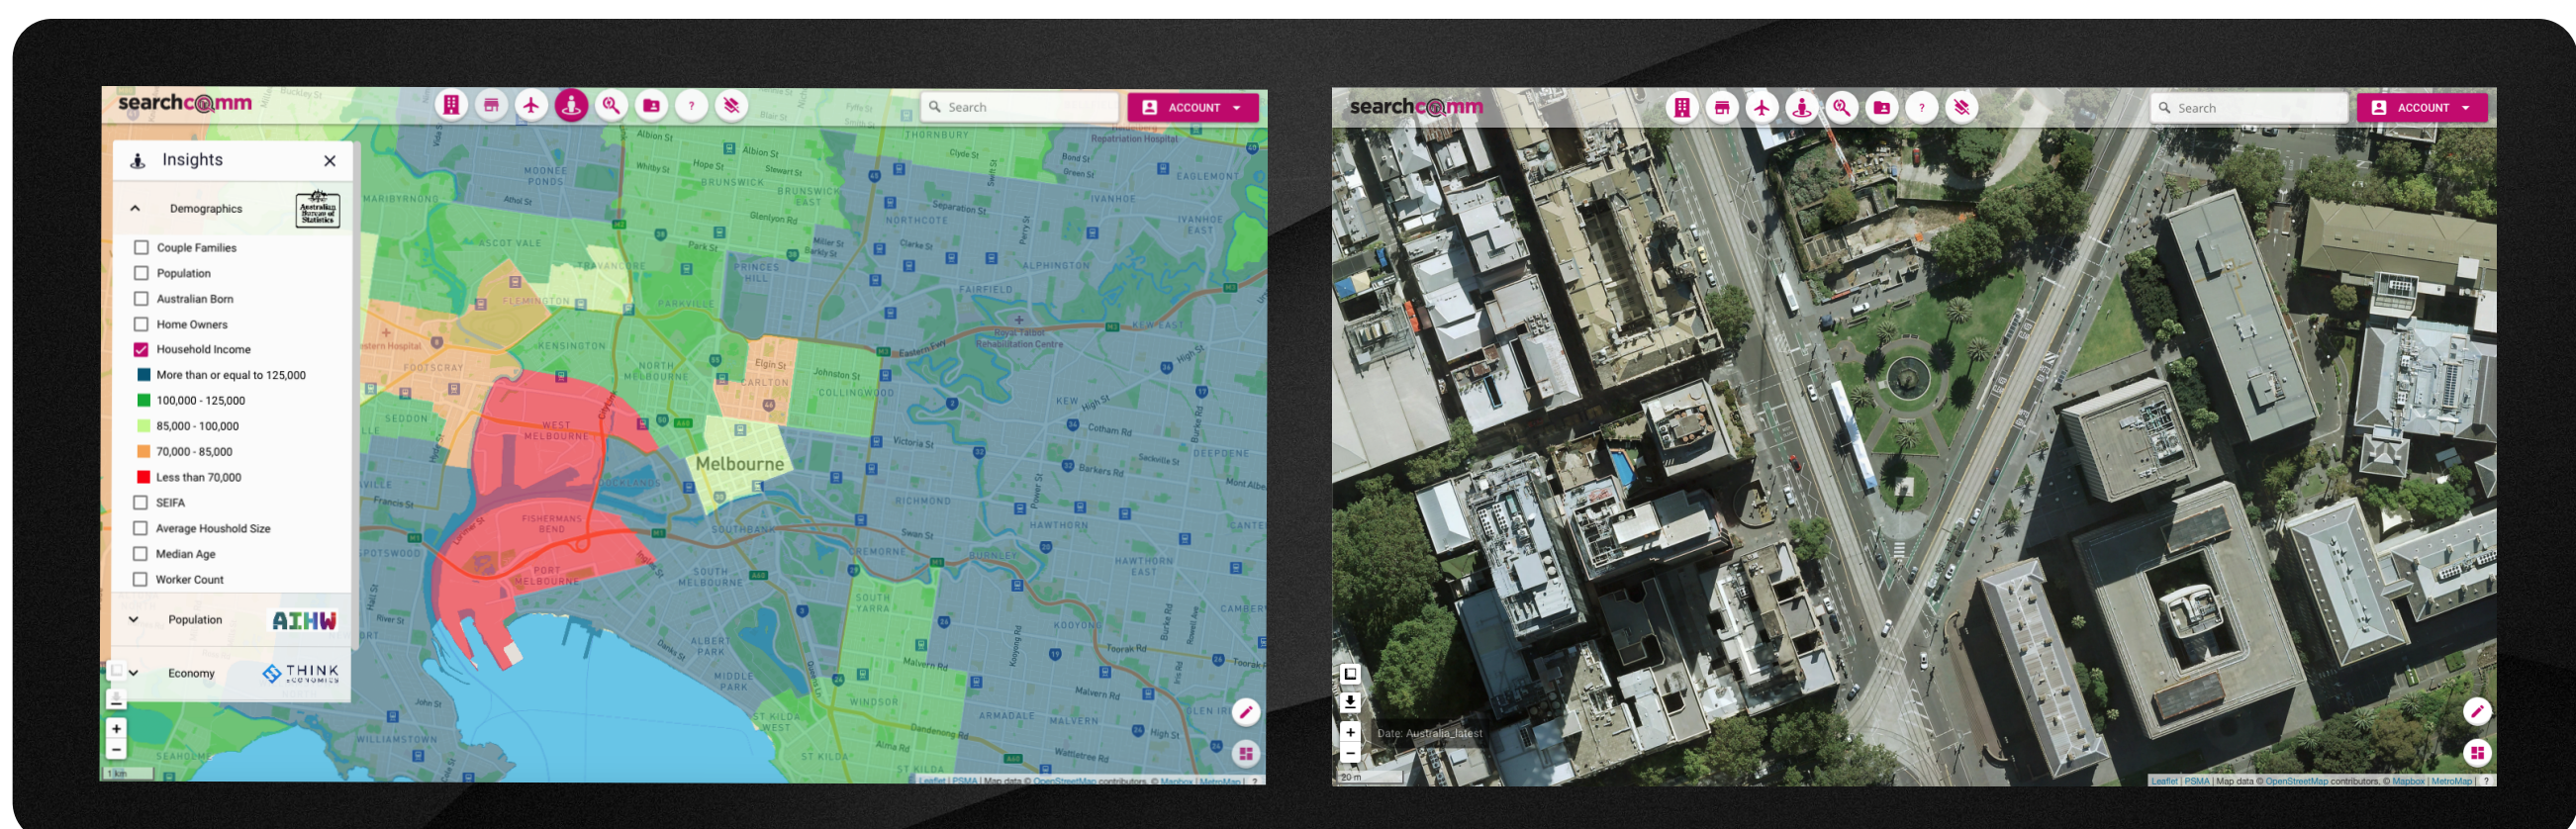

Search Commercial has responded to demand for bespoke property technology, providing the ability to pull together a suite of tools & insights to complete desktop appraisals of Commercial property.

Our easy-to-use software will assist property professionals, whether it be Financiers, Brokers, Insurers or Valuers to complete due diligence with greater efficiency.

Are you wondering what exactly Search Commercial has for you? Lets take a look below:

- Search any property in Australia and identify key site information inclusive of site area, land use, frontage & much more
- Analyse current & historical images available for any location, and consider possible site constraints or urban change over time
- Establish a 5, 10, 15 & 20 (drive, walk or bicycle) catchment area and understand key socio-economics such as median income, age, population and more
- Utilise key Insights & heat-mapping features that highlight urban expansion and growth trends
- Generate suburb-level insights with our integrated Suburb reports, and view local market data.

Customisation is key so lets get creative with Search Commercial! Utilise our inbuilt custom mapping functionality to help you and your clients visualise your market findings:

- Map multiple properties at one time and note key information
- Create maps for competitor analysis
- Targets/prospects of locations for future work
- Showcase client asset portfolio

With a range of features all in one platform, Search Commercial has what you need for research on the go, anywhere, anytime.
